

Premium Editing Service

Our Premium Editing Service is designed for academic manuscripts, abstracts, conference posters, slide presentations, and other document types (e.g., technical reports, public out-reach materials, and job application materials, including CVs, cover letters, teaching and research statements, etc). Our goal is to ensure that your documents conform to the highest standards of written English, are formatted consistently and appropriately, and are structured in a logical manner.

This service relates to the main text sections of your document (including the title page, tables, figure captions, in-text citations, references, and acknowledgements). You may choose to exclude any text that you wish from the editing process.

As standard, this service includes:

- Review of spelling, grammar, and punctuation
- Review of the structure of your document
- Review of scientific terminology
- Review of the clarity of your arguments and identification of any obvious or significant gaps in logic
- Review of formatting to ensure consistency

Please let us know if your document should be formatted for a specific journal or using a specific style. Otherwise, wherever possible, we will follow the formatting style of your original submission.

Where necessary, our editors will offer suggestions on the restructuring or moving of sentences, paragraphs, and/or sections. Please note, that for major revisions such as these we offer two options:

- (a) our editors will implement changes themselves (don't worry, we will let you know what changes we make) or;
- (b) our editors will make comments about suggested changes for you to implement yourself.

Please let us know which approach you prefer when submitting your files.

When editing references, we will ensure that:

- (a) all in-text citations are included in the reference list;
- (b) all reference list entries are cited within the main text;
- (c) all references are correct, provided in full, and formatted appropriately.

For documents edited using word processing software, we will return two versions of your edited document: one containing all comments and track changes, and one a fully edited manuscript with all suggested revisions implemented and track changes removed.

Please note that we will not comment on the scientific content or merits of your submission. **Our review does not guarantee acceptance following submission to a journal.**

Optional Extras (free of charge)

1. Check and implement journal instructions.
2. If required, we will perform word cutting of up to 15% of the total document length. Should you require a greater degree of word cutting, please let us know and we will amend your quotation accordingly.
3. Unlimited questions and clarifications for your editor. If you have any queries about the way in which your document was edited just let us know and your editor will answer your questions.
4. A single, free, pre-submission proofread of your completed manuscript. This proofread will check for spelling, grammar, punctuation, typos, and other minor errors.

Additional Services

For details on additional services, please see our [website](#).

1. Figure review and editing
2. Figure design
3. Conference poster design
4. Presentation design
5. Data processing

Document Formats
